

# Symbolic Material Culture within an Ancient Catastrophic Temple Complex

Dr. Henry Walton Jones Jr.

1984-01-01

## Introduction

This is a totally made-up study on a completely fictional archaeological site, but the data are very real.

Blah, blah, blah.

It is **very** important to state that *any **conclusions*** reached in this report are the ramblings of a *fictional* character.

## Materials

Here is a list of materials used during excavation:

- whip
  - for carefully excavating ancient materials
  - \* something else
- hat
  - for protection form the hot sun
  - \* something else
- gun
  - to keep away dig-site cats

In order of importance

1. gun
2. hat
3. whip

## Methods

I recently learned how to use R and couldn't wait to use it in this study! I am using R version 4.4.3 (2025-02-28) Trophy Case.

## Results

Table 1: This is a useful caption.

Phase	Mean (cm <sup>2</sup> )	SD
post	6820.000	2335.2195
disturbed	6656.333	923.3474
pre	6383.346	1624.9737
euro	6288.071	2053.0179
NA	4666.281	2564.9596
chi	3772.500	1238.9613

Here's a figure

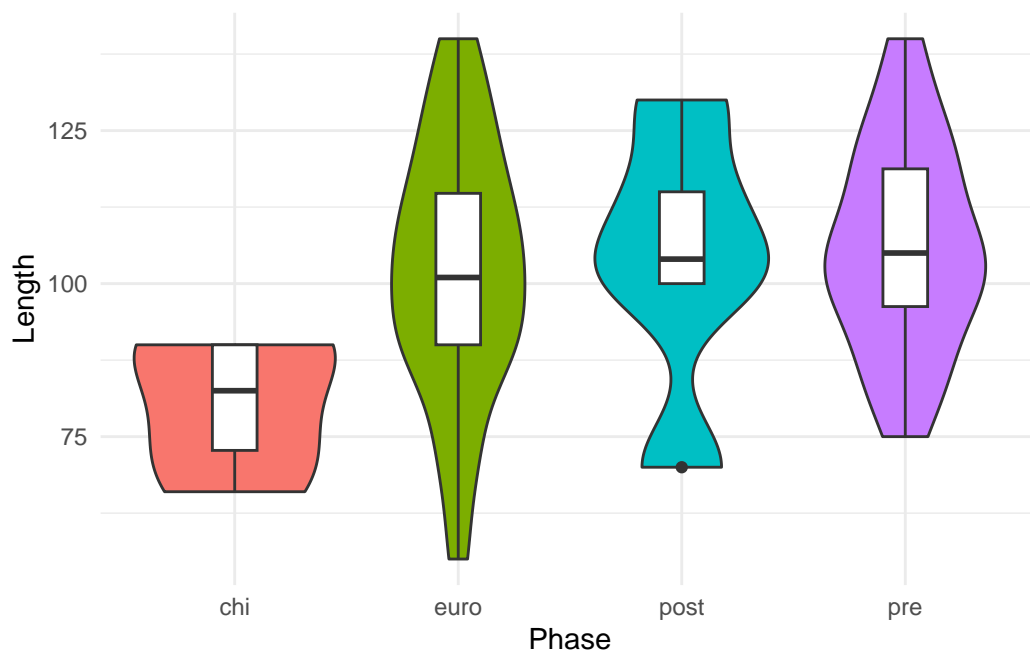

Figure 1

This argument is supported by Table 1 and Figure 1

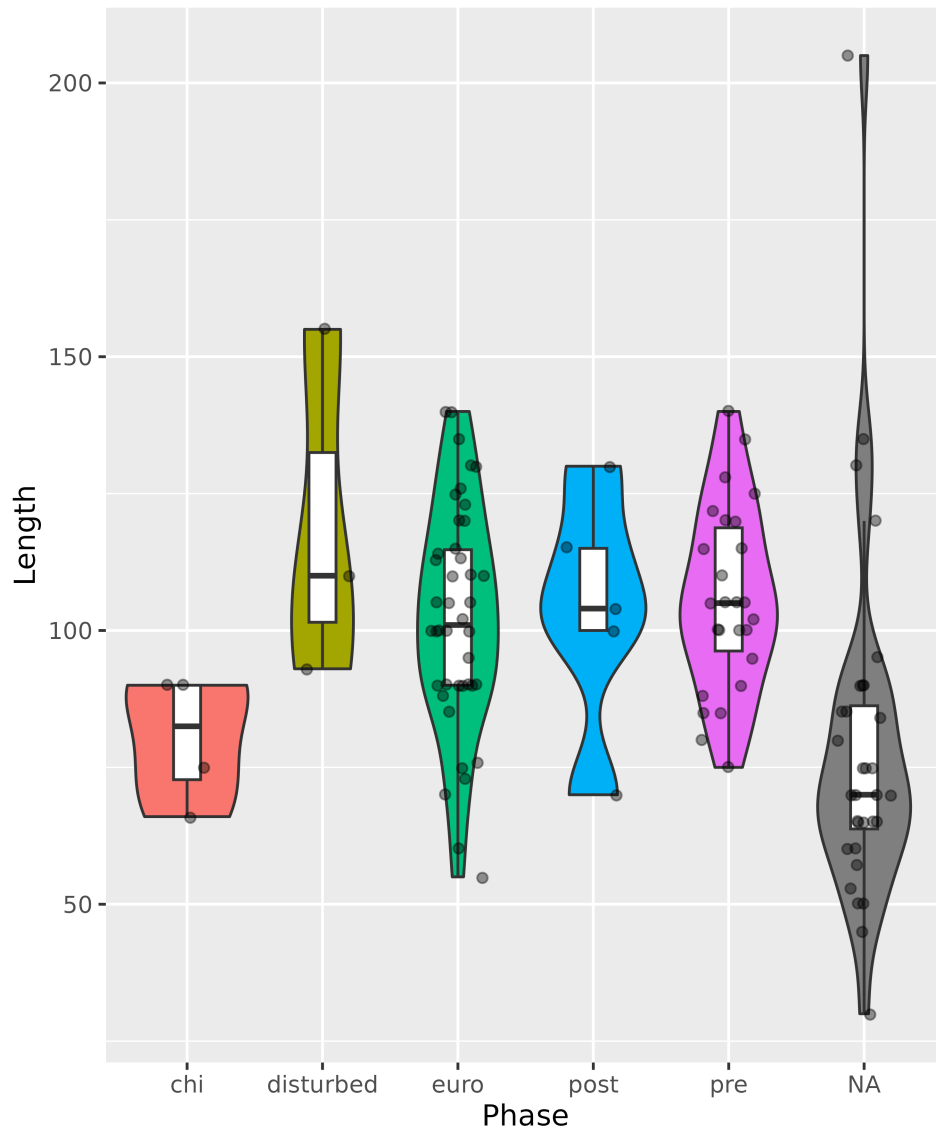

Figure 2: Caption.
